Summary

Software engineer working where machine learning meets the interface. I build ML systems end to end, from simulation and model training to the APIs and frontends people use. Currently building a clinician-facing voice assistant at HealthStack.

Experience

AI & Frontend Engineering Intern · HealthStack, Remote, Ibadan Aug 2026 – Present

- Building a clinician-facing voice assistant for HealthStack's chat-first EMR, which runs day-to-day operations for small and mid-sized Nigerian hospitals.

Frontend Engineering Intern · Rise Academy, Remote Jan 2026 – Present

- Year-long frontend programme, shipping team products across HTML, CSS, React, Vue and Tailwind.
- Luminary** (open source): built the landing page contributors section, the searchable Women's Directory and the long-form article page for a platform spotlighting women.
- Cupid's Board**: built a calm, vanilla HTML/CSS space for sharing notes and memories on a CSS-variable design system, and wrote a case study on it.
- Shelves**: designing digital shelves for tracking books and reading.

Coding Instructor Intern · Unicorn Den, Ibadan May – Sep 2022

- Taught HTML and CSS to children aged 8-12 through hands-on projects.

Selected projects

TriageRL · Reinforcement learning for emergency department triage 2026

- Built a stochastic ED simulation and trained a MaskablePPO agent after a DQN proof of concept; deployed through FastAPI and a React dashboard.
- Cut average wait 35.0% and P90 wait 35.4%, and raised throughput 7.6% against a severity-rule baseline.

Python · PyTorch · Gymnasium · Stable-Baselines3 · FastAPI · React · SQLite

Afroglot · Speech to text and back for Yoruba, Igbo and Hausa 2025

- Built recording, upload, transcription and tonal speech synthesis, with authentication and cloud audio storage.

React · Firebase · Spitch APIs

ML StudyBuddy · Science tutor from a fine-tuned small language model 2026

- Fine-tuned TinyLlama-1.1B with LoRA on SciQ, evaluated against the base model (ROUGE-L 0.230) and deployed through Gradio.

Python · Hugging Face Transformers · PEFT/LoRA · Gradio

Education

BSc Software Engineering, specialising in Machine Learning & AI · African Leadership University Graduating July 2027

First Class · all coursework complete

Skills

Languages Python, JavaScript, TypeScript, Dart, HTML, CSS

ML PyTorch, Stable-Baselines3, Gymnasium, Hugging Face Transformers, PEFT/LoRA

Web & mobile React, Vue, Tailwind CSS, FastAPI, Flutter, Firebase, SQLite

Tools Git, Bash, Vercel, Figma, n8n

Leadership & more

- Vice President, ALU Astronomy Club**: ran events on astronomy, physics and scientific inquiry.
- Organiser, Agahozo-Shalom Youth Village visit (2025)**: planned a solar farm learning visit and ran STEM trivia workshops.
- Writing**: technical devlogs on Medium; personal essays on Substack (*Ofuje's Rough Drafts*).
- Certificates**: freeCodeCamp Responsive Web Design; JavaScript Algorithms & Data Structures.
